Good Morning ORD:

Thank you for the informative briefing yesterday, I think it went well. There were two follow up questions that came in that are captured below:

- As part of the peer review process for IRIS assessments, I understand that more complex assessments are usually reviewed by a full Scientific Advisory Board. How has having no members on the SAB impacted the SAB review part of the process? (Does ORD want to respond to this one or should we have the SABSO respond?)
- And specifically for the formaldehyde assessment, does EPA plan for it to be peer reviewed through a contractor-led letter review or a panel?

Ex. 5 Deliberative Process (DP)

Please provide information on the two questions above and let me know your thoughts as how to best proceed.

Thanks -

Christina J. Moody
